

General questions regarding Everhot cookers

How much power does an Everhot use on average?

When set at our recommended cooking temperatures our 2/3 oven cookers will consume around 85 units of power per week.

Does an Everhot need annual servicing?

No regular servicing is required – a substantial cost saving over the life of the product.

What sort of guarantee is offered on an Everhot?

We offer a parts and labour warranty for 24 months following purchase – although our elements are covered for 5 years (parts and labour).

Does it get too warm in the summer?

This of course depends on a number of factors; the size and orientation of your kitchen etc. During periods of very warm weather you might wish to turn off one or both of the ovens in order to reduce the heat output from the cooker.

The vast majority of our customers do not have a secondary means of cooking and are happy to use their EVERHOTS for 12 months of the year.

Can I take my Everhot with me if I move house?

This is one of the great advantages of the EVERHOT – it can move house with you – although it does weigh at least 250KG (EVH 60) and some removal companies may ask that you utilise our services.

How easy is it to clean?

The hotplates and ovens are always at working temperature and therefore any food spilt on them will carbonise and can be swept away. The stainless steel sections may sometimes benefit from cleaning with Barkeepers Friend and a light scouring pad. The rest of the cooker (exterior and stainless steel surfaces) should be wiped with a damp cloth after use.

How does an Everhot compare to other ranges like Agas/Rayburns?

The principle is very similar however our product offers a great deal more control than the majority of other heat storage ranges – this enables you to set exact cooking temperatures if required – or even to turn off part of the cooker whilst leaving the rest on. It also incorporates a grill.

It is therefore possible for example to have two adjacent simmer plates when cooking jam or two roasting ovens on Christmas morning.
